ONETOUCH™ 9220 USB

Scanner with Slide & Negative Adapter

Unleash the Power!

•48-bit Color •4800x2400 dpi •USB 2.0 Interface •Win 98/2000/ME/XP

Visioneer wrote the book on ease-of-use. Our revolutionary OneTouch technology simplifies the way people think about and use scanners. The OneTouch buttons are pre-configured for common scanning tasks so you get great results within minutes of opening the box. Button settings can be customized to unleash even more power for advanced users. The Visioneer OneTouch 9220 USB is blazing fast. The Hi-Speed USB logo is your assurance that the OneTouch 9220 USB transfers data to your computer up to 40 times faster than a USB 1.1 scanner. The OneTouch 9220 is fully compatible with all USB ports including USB 1.1.

Award-winning Software

ScanSoft PaperPort

The world's best-selling document and image management application creates thumbnails of everything you scan allowing easy filing in color-coded folders. ScanSoft's TextBridge Optical Character Recognition engine is built-in to PaperPort so you can easily use the scanner's OCR button to scan printed text directly into your word processor where it is fully editable.

ArcSoft PhotolImpression

ArcSoft PhotolImpression offers the perfect combination of power and simplicity so you can do more with your photos. From quick corrections to creative editing, you can easily achieve high-quality results. Whether you scan traditional photos, slides or negatives, PhotolImpression makes digital imaging a breeze.

Features and Benefits

Superb Image Quality

48-bit internal color capability recognizes over 281 trillion colors. 48-bit scanners capture more detail in the shadow and highlight areas of an image than their 42-bit predecessors, so you'll get brighter yellows, richer reds, cooler blues, and everything between.

High Resolution

4800 x 2400 dpi optical resolution eliminates jagged edges and captures the finest detail from your original. That's enough resolution to turn a 4" x 6" photo into a 32" x 48" image with no loss of detail.

Powerful Scanning of 35mm Slides and Negatives

The Visioneer OneTouch 9220 USB includes a built-in backlight and film holder for scanning 35mm slides and negatives. Archive old photos from negatives for higher quality. Scan up to three 35mm slides or a strip of four negatives at a time.

Easy to Use

Just press a OneTouch button to scan and send an image to the destination of your choice. While intelligent default button settings give perfect results on common scanning tasks, the OneTouch preferences utility makes it simple to customize the buttons if needed.

Unleash the Power!

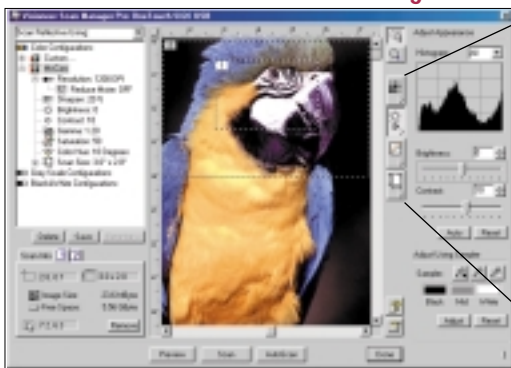

Powerful Software

The OneTouch 9220 USB comes with all the software you need to scan, edit, create and share a huge assortment of projects. ScanSoft PaperPort let's you easily manage your documents and images. PaperPort's built-in TextBridge OCR engine converts scanned text into editable documents. ArcSoft PhotImpression software allows you to edit your images and turn them into stunning visuals for sharing by print, web or email.

PaperPort automatically links to many popular applications. Just drag and drop a scanned image or document on the link of your choice to launch the application and put your images to work. PaperPort even links to your printers and to most email and fax applications.

Visioneer Scan Manager Pro

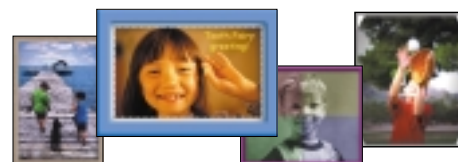

- Image adjustments automatically update in preview window
