

## Visioneer OneTouch®

From its conception, Visioneer OneTouch has changed the way people scan by reducing multiple steps in the scan process to the single touch of a button. In fact one of the first ads lists the actual steps saved to email a photo, 14 reduced to 1. Button scanning is a great idea and most scanners and MFPs sport a SCAN button intended to save some measure of time or steps. Everyone has accepted that ease-of-use is the goal.

Not all buttons are created equal. It seems the ease-of-use goal sometimes gets lost along the way. After pressing the SCAN button, some scanner devices require additional mouse clicks or file naming or destination confirmation. So there are highly varying results when you click the SCAN button. Many have limited destinations and don't extend to server-based applications such as Xerox DocuShare and Microsoft SharePoint or custom applications.

Scan and Deliver. Visioneer OneTouch requires just one touch to process the entire scan job. It initiates the scan, and delivers the complete document to its destination, no additional clicking, no forced confirmation of destination, no partial jobs. Kofax VRS technology is also integrated into OneTouch for perfecting the scanned image. That is why the technology is named OneTouch and not "SCAN, click and another click". Only Visioneer OneTouch is a purely one touch scanning process exclusively on Visioneer & Xerox DocuMate scanners. An SDK is also available to develop additional scanning destinations.

## Visioneer Warranty Programs

The Visioneer Scanner support teams are made up of U.S. based in-house trained professionals using industry best practices, ready to support you at the highest level to ensure quick resolution to technical issues.

Each product is shipped with a **Standard** one year warranty including technical phone support, access to our extensive online knowledgebase, and a return-and-replace service in the event a RMA (return material authorization) is needed. Warranty extensions are available through either our Advance Exchange or Onsite Repair warranties.

### Advance Exchange Warranty

Available for Workgroup and Departmental scanners, the Advance Exchange Warranty may extend your warranty up to a total of 5 years of warranty coverage. It also includes priority phone response to our technical support and problem escalation for an unlimited number of incidents. Should our technical support team determine a replacement is necessary, a replacement unit will be shipped in advance via Overnight service, for a next-business-day delivery.

### Onsite Repair

The ultimate service available for Production scanners, the Onsite Repair Warranty may be purchased for up to 5 years of total coverage. Priority phone technical support is provided for an unlimited number of incidents, and in the unlikely event our technical support team determines that the unit is experiencing a hardware failure, a technician will be dispatched onsite the next business day to repair the unit with minimal downtime.
