NEWS for Immediate Release

Visioneer® and Marex Group Announce OneTouch Scanning to FileBound and Docuvation Content Management Solutions

OneTouch Link enables any Visioneer or Xerox® DocuMate® scanner to control, manage, and distribute documents from disparate sources

Pleasanton, CALIFORNIA – August 19, 2008 – Visioneer, Inc., a leader in intelligent imaging solutions, and Marex Group, Inc., developers of FileBound and Docuvation, today announced a certified Visioneer OneTouch Link to both enterprise content management (ECM) solutions. Using the [Visioneer OneTouch® Links Software Development Kit](#) (SDK), Marex Group developed a link that allows users to scan documents, from any Visioneer or Xerox-branded scanner with OneTouch Technology, directly into FileBound and Docuvation document management solutions with the touch of a single button.

FileBound is an affordable web-based content management solution that can be deployed locally or outsourced as a SaaS/ ASP service. FileBound allows mixed content to coexist seamlessly within the system and offers integrated e-forms, robust workflow, integration with external applications, and unlimited users. Docuvation is an outsourced Document Management solution targeted to the small and medium business market.

“Ease of use drives so many important decisions made about technology today,” said Rex Lamb president of Marex Group. “We are truly impressed with Visioneer’s constant commitment to ease of use and rapid deployment of the FileBound and Docuvation One Touch Link.”

The FileBound and Docuvation OneTouch Link is available to all resellers and scanner owners through the Marex Group. Please call 888-449-4978 for more information.

“Our goal is to make a process that appears complex, easy to accomplish. With Visioneer OneTouch, you can scan a document and send it to your capture software and let the rest of the document management process take over. The new OneTouch Link to FileBound and Docuvation lets users concentrate on their workflow and not how to get their documents into the workflow,” said John Dexter, vice president of business development at Visioneer.

Visioneer SDK for ISVs

The Visioneer OneTouch Links SDK is a wizard-based template that can be used to easily implement new functionality within the Visioneer OneTouch interface. Links developed with the OneTouch Links SDK will have access to all OneTouch functions, including the benefits of [Kofax® VRS™ \(VirtualReScan®\) technology](#) that is integrated into Visioneer OneTouch. Links can be created to provide scan-to destinations, such as applications, devices (printers or fax servers) or locations (network or local folders).

The OneTouch Links SDK list price is \$499, which includes a support component, and is available from Visioneer. For more information, developers should contact the Visioneer business development team at onetouchsdk@visioneer.com.

About Visioneer

Visioneer provides a broad range of scanning solutions for the desktop, distributed and departmental document imaging markets as well as the mobile and remote business scanning segments. In 2003, Visioneer combined its leading scanner technology with the Xerox brand recognition to develop the Xerox DocuMate product line. Visioneer and Xerox DocuMate high-performance business scanners and imaging software solutions offer users speed, image quality, advanced paper handling and ease-of-use with exclusive Visioneer OneTouch™ technology. These products have received numerous awards including AIIM Best of Show in 2004 and 2005, as well as consecutive PC Magazine Editors' Choice Awards in 2005 and 2006. For additional information on Visioneer and Xerox scanning solutions, visit www.visioneer.com or www.xeroxscanners.com.

Visioneer offers both product lines under a single reseller partners program. The 20/20 Perfect Vision program optimizes VAR margins and sales opportunities through volume incentive rebates, sales support and marketing tools. Additional information can be found at www.visioneer.com/2020.
