## NEWS for Immediate Release

# Visioneer Announces OneTouch Scanning Solution to Convert Paper Checks into Electronic Deposits

New OneTouch Link enables any Visioneer or Xerox® DocuMate® scanner to convert paper checks into digitized, electronic deposits using ACHeck21® check processing software

Pleasanton, CALIFORNIA – December 2, 2009 – Visioneer®, Inc., a leader in intelligent imaging solutions today announced a Visioneer OneTouch® Link to [Diversified Check Solutions ACHeck21](#) – an intelligent ACH (Automatic Clearing House) and Check21 web-based remote capture solution. This solution allows users to scan paper checks using any Visioneer or Xerox-branded scanner with [Visioneer OneTouch®](#) technology, and accurately convert them into electronic deposits to any U.S. bank with the touch of a single button and incorporate that data into the most popular accounting systems, including Intuit QuickBooks®.

“ACheck21 represents the first true end-to-end check deposit solution in the financial services technology industry. Our solution is extremely versatile, allowing customers to easily deposit checks to any U.S. bank saving time and travel to bank in person,” said Sam Ackley, managing partner of Diversified Check Solutions. “Customers gain quicker access to funds, realize significant cost savings, and achieve heightened check processing accuracy.”

### Remote Deposit Banking

[Remote deposit](#) enables users to scan and deposit checks to their U.S. bank electronically, from any location where they have their computer, an internet connection and their Visioneer OneTouch® enabled scanner. Simply scan the check using the OneTouch link into the ACHeck21 on-line process, view the check images to make sure they are legible and the check amount is correct and then click DEPOSIT. The ACHeck21 software reads the check amount, along with the check number, routing and account number and securely sends the check information to a clearing house for deposit into the designated bank account electronically.

Personal checks, business checks, money orders and cashier’s checks can be scanned and deposited using any Visioneer or Xerox DocuMate scanner including the [recently announced Xerox Card Scanner 200](#). Priced at only \$179.99, the Xerox Card Scanner 200 is no bigger than a whiteboard eraser and is USB bus-powered, so its small, lightweight design is right-sized for a brief case or desktop.

“Specialty MICR check scanners are expensive and only offer value for scanning checks, where Visioneer and Xerox DocuMate scanners also have the capability to scan and manage all your personal and business documents of various sizes,” said John Dexter, vice president of Business Development at Visioneer. “The new OneTouch link to ACHeck21 brings our customers the added bonus of being able to optically scan checks and expand the utility and value of their scanner to yet another special purpose.”

### **Quality Images and Total Security**

Documents and checks scanned through any OneTouch Link also have improved image quality instantly through use of Kofax VRS technology which is integrated in Visioneer OneTouch. This is done immediately after scanning so that checks protected by watermarks are sent to ACHeck21 with significantly improved image quality. This application especially requires high image quality from the many varied check patterns and colors so that reading check amounts and account information on the check is accurate first time. All bank account information is secure and only available to those ACHeck21 employees who have a “need to know” and user account information is not provided to any unrelated parties including Visioneer for any reason unless subpoenaed by a court. The ACHeck21 servers are located in a highly secure SAS70 facility that meets the highest security standards. A SAS70 II audit is performed annually by an independent auditor.

### **Availability**

The ACHeck21 link is part of the new Visioneer OneTouch release that is available for download from [Visioneer](#) or [Xerox](#), depending on the brand of your scanner. More information about ACHeck21 is available from [Diversified Check Solutions](#) (DCS). DCS offers several subscription packages based on the number of deposits completed per month. Information on pricing can be obtained by emailing [sales@ACheck21.com](mailto:sales@ACheck21.com). A [detailed FAQ](#) can be found on the DCS web site as well.

### **Visioneer SDK for ISVs**

The ACHeck21 link was developed with the Visioneer OneTouch Links Software Development Kit (SDK), a wizard-based template that can be used to easily implement new functionality within the Visioneer OneTouch interface. Links developed with the OneTouch Links SDK will have access to all OneTouch functions, including the benefits of Kofax VRS technology that is integrated into Visioneer OneTouch. Links can be created to provide scan-to destinations, such as applications, devices (printers or fax servers) or locations (network or local folders).

The OneTouch Links SDK list price is \$499, which includes a support component, and is available from Visioneer. For more information, developers should contact the Visioneer business development team at [onetouchsdk@visioneer.com](mailto:onetouchsdk@visioneer.com).

### **About Diversified Check Solutions LLC**

Headquartered in Lake Saint Louis, Mo., Diversified Check Solutions LLC is a leading provider of financial services technology solutions. The Diversified team knows check processing. We have made it our mission to create, deliver and support quality financial software solutions that provide our customers with all-encompassing tools for success. ACHeck21 is our masterpiece – a comprehensive and scalable end-to-end software solution that follows an intelligent business workflow. For more information about Diversified Check Solutions, please visit our Web site at [www.diversifiedchecksolutions.com](http://www.diversifiedchecksolutions.com).

### **About Visioneer**

Visioneer provides a broad range of scanning solutions for the desktop, distributed and departmental document imaging markets as well as the mobile and remote business scanning segments. In 2003, Visioneer combined its leading scanner technology with the Xerox brand recognition to develop the Xerox DocuMate product line. Visioneer and Xerox DocuMate high-performance business scanners and imaging software solutions offer users speed, image quality, advanced paper handling and ease-of-use with exclusive Visioneer OneTouch® technology. For additional information on Visioneer and Xerox scanning solutions, visit [www.visioneer.com](http://www.visioneer.com) or [www.xeroxscanners.com](http://www.xeroxscanners.com).

Visioneer offers both product lines under a single reseller partners program. The 20/20 Perfect Vision program optimizes VAR margins and sales opportunities through volume incentive rebates, sales support and marketing tools. Additional information can be found at [www.visioneer.com/2020](http://www.visioneer.com/2020).
