

Smart Scanning Made Simple

visioneer **ONETOUCH™** 5300 USB SCANNER

The Visioneer® OneTouch™ technology is changing the way people think about and use scanners, thanks to its revolutionary integration of hardware and software. The OneTouch 5300 USB is not just an incredibly powerful way to scan; it is the faster, smarter, easier way to fax, copy, e-mail, or publish documents. With its dedicated function buttons and powerful software integration, it is the office tool you have been waiting for.

Easy to set up, easy to use

Just install the OneTouch software, plug the Visioneer OneTouch 5300 USB into your computer's Universal Serial Bus and you are ready to scan! OneTouch uses your USB port, so there is no need to open the computer to install an interface card, or worry about IRQs, DMAs, SCSI IDs, or other settings. With USB, there's no need to worry about compatibility with your other peripherals.

Push-button convenience for configuring and executing tasks

The Visioneer OneTouch 5300 USB enhances the way you currently work rather than changing it. Simply push a button to scan, fax, copy or print, just like a photocopier or fax machine. Want to e-mail a picture to a relative across the country? OCR an interesting article for editing in Microsoft Word? With the Custom button you can easily do all this and more. OneTouch automatically integrates with the applications on your PC, so all you need to do is push the button.

Flexible scanning platform

Easily scan any kind of document – everything from business cards and memos to books and magazines – with one touch of the scan button. The top of the scanner can even be elevated or removed to accommodate books and bound documents.

Fastest scanner from "Scan to Finish"

Touch any of the buttons to scan and route just about anything – in seconds. Whether sending a magazine article to your branch-office, a corporate press-release to everyone in the organization, or a birthday card to your favorite niece, the Visioneer OneTouch 5300 USB makes the process fast and easy.

This high-quality 36-bit scanner uses your computer's USB port for fast, efficient scans, while the incredible software integration enables rapid transfer of your scanned file to your fax, e-mail, printer or other applications or devices. OneTouch - that's all it takes.

PaperPort software links your scanned papers and pictures with the applications you use every day

The included PaperPort software is the industry-leading application for organizing and sharing documents on the PC. With over 4 million copies in circulation it has proven itself time and again as the best tool for linking scanners with the applications people use every day.

PAPERPORT®

Scan

Scan photos, business documents, articles, even 3-D objects directly into the award-winning PaperPort software.

Copy

Create clean, crisp digital copies by sending scans to your color or black-and-white printer.

Fax

Transmit your scan directly to your fax software. Simply fill in the fax number on-screen and you are done!

Custom

Configure this button to send your scanned page to the application or device of your choice – a second printer, your favorite word processing software, or to your e-mail application.

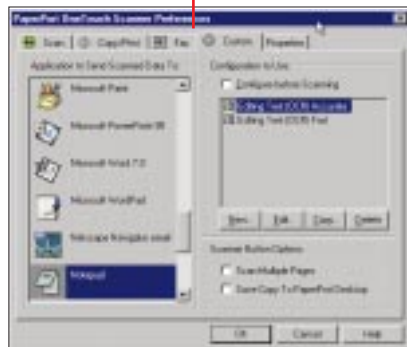

Stop/Cancel

Instantly cancel any scan in progress.

Effortlessly configure any button using the convenient pop-up menu.

Select the application you wish to link to, adjust the application settings and you are done. Next time you touch this button on the scanner your document or image is automatically routed to the application or device you selected.

Contents

- Visioneer OneTouch 5300 USB Scanner featuring: 300 x 600 dpi Optical Resolution, 36-Bit Internal Color, and Five Button Hardware Controls
- PaperPort Deluxe Software on CD-ROM
- USB Connector
- Installation Guide
- Power Supply

Drag and drop to your favorite Windows® applications

PaperPort automatically builds graphical links to supported installed applications. Simply drag a document thumbnail onto the link icon and your document is on its way to that application! PaperPort works with hundreds of applications including most popular image-editing, office productivity, fax and e-mail applications.

Built-in OCR

Drag and drop scanned documents to your word processing software link. The built-in OCR automatically converts them into editable text.

Advanced Filing System

Easily file your documents and images the way you organize paper documents - in file folders on local or network drives. Put folders within folders and color-code them for easier arrangement.

MGI PhotoSuite II SE is the complete PC photography software experience. Its powerful tools let you easily capture, touch-up, transform, organize, create, show, and share photos with family, friends and business associates. With high-quality templates for creating everything from calendars and greeting cards to picture collages or business stationery, MGI PhotoSuite II SE delivers unparalleled functionality, productivity and entertainment to home and business users.

Minimum System Requirements

- Pentium or equivalent
- Windows 98
