

PhotoPort™ TV 100

The Easy Way To Share Your Photos!

- *Enjoy creating fun photo albums in the comfort of your family room*
- *Personalize your photos by adding colorful captions, borders and backgrounds*
- *Record your albums on videotape to share with friends and family*

The Visioneer PhotoPort TV 100 gives you instant access to your digital pictures. There's no waiting for a computer to bootup, attaching cables from the camera to your PC, transferring pictures, searching through cryptic file names, or loading an image editing program.

Simply attach the PhotoPort to your TV's (Video-In) connector, insert the memory card from your camera into the slot, and create a photo album using the wireless keyboard. You can crop, resize and rotate your pictures, then add colorful backgrounds, borders and entertaining captions. When you're done, gather the family around the TV and share your memories in the comfort of your living room or record them to videotape to send to friends.

Also Includes:

- Video cable • Batteries • Power supply
- User's Manual • Quick Start Guide

Works with digital cameras using CompactFlash™ or SmartMedia™

PhotoPort™ TV 100

The PhotoPort TV 100 wireless keyboard has dedicated keys to easily create photo albums and personalize your pictures.

Rotate and resize photos on each page

Create

Use your digital camera to capture memories of friends and family, vacations, birthday parties and special events. Easily attach the PhotoPort TV 100 to your TV and insert the memory card from your camera into the slot. Then start creating photo albums from the comfort of your family room.

Crop to select portions of a favorite image

Personalize

Add colorful backgrounds, fun captions and decorative borders to your photos. Crop, rotate and resize your pictures and place them into shapes such as stars and hearts.

Choose colorful backgrounds and borders to enhance your layouts

Share

Gather the family and watch the story unfold. Your kids and friends become TV stars! Connect the PhotoPort TV 100 to your VCR and record the photo album on videotape to send to friends and family.

Insert additional photos to create your own collage

Add captions in different shapes, fonts and colors
