

VERTICAL MARKET SOLUTION

LAW ENFORCEMENT / PUBLIC SAFETY

Situation

Law Enforcement & Public Safety: Police, Fire, and EMS departments handle and manage substantial quantities of paper. Reports, case filings, court reports, forms, bulletins, training manuals; all this in addition to the enormous task to protecting and serving the public. Documents are the substance of communication, reference, and evidence of law enforcement and public safety.

Document Management Issue

Most precincts and fire houses are inundated with filing cabinets full of paper. It is expensive to store. Retrieval, even with an elaborate filing or indexing system, still requires human intervention to physically search and verify the document being retrieved. Once found, the documents are usually handled further (copied, faxed, mailed) adding expense to inconvenience. Police, Fire & EMS departments are then faced with deciding among a myriad of document management systems which can be expensive, complex, long to implement, and difficult to use.

Visioneer Solution

Scanning incoming and legacy documents with Visioneer scanners changes the entire document paradigm. Visioneer has a broad range of document scanners with varying speeds and paper handling choices to streamline the paper-to-digital conversion at the desktop and departmental level. Visioneer include a robust document management software bundle that includes PaperPort (award-winning application for managing documents at the desktop) to convert paper to PDF (or most other document file formats with Visioneer's OneTouch technology. With OneTouch technology, documents are scanned and filed in the format of choice to local or network folders. Documents can then be OCR'd, emailed, printed or edited without retyping from within the PaperPort desktop, perhaps one of the most intuitive and easy to use applications available. (PDF is a document format standard that can be viewed and printed by any computer platform using the prolific free Acrobat Reader from Adobe.) To assure compatibility with hundreds of document imaging application, Visioneer scanners include TWAIN and certified-ISIS drivers to easily integrate with existing or future document management systems.

Law Enforcement & Public Safety can use this solution to capture incoming documents from officer reports, criminal records, official court documents, and internal communiqués. Visioneer intelligent imaging solutions also provide PDF file creation from any Windows application such as MS Word, WordPerfect, and Excel. This is useful for document archiving as well. Law offices have already begun using this solution for ECF (Electronic Case Filing), which US District Courts now accept, but only in PDF format.

Product Solutions

Portable Solution

Strobe XP100 (\$199.99)

The Strobe XP 100 is the perfect companion for the mobile user. Use it to scan and organize all of your documents, photos, articles, reports, and records. Packs easily in a laptop bag. The Strobe XP100 is powered by the USB port to scan in the courtroom, precinct, fire station, in the field, anywhere.

Desktop Sheetfed Solution

Strobe XP200 (\$299.99)

The Strobe XP 200 is the ideal solution for users who need a fast scanner with a small footprint. The Strobe XP 200 fits perfectly between a keyboard and monitor and scans approximately 6 pages per minute. Strobe XP 200 is tightly integrated with ScanSoft PaperPort Deluxe 9 making it easy to scan directly to PDF format. Now you can scan and file all of your documents and contracts electronically right alongside your electronic office documents PDF files from Adobe Acrobat and image files from numerous other applications. The XP200 is Kofax VRS-certified to make this one of the most versatile scanners ever developed.

Workgroup Solution

Strobe XP450 (\$699.99)

The Strobe XP 450 PDF is a compact workgroup scanner that can scan 20 pages per minute and includes a built-in 50-page automatic document feeder (ADF). Connect quickly and easily via the Hi-Speed USB 2.0 interface. The scanner offers one of the smallest footprints of any ADF scanner on the market. Scan any document to Adobe® Portable Document Format (PDF) using the included PaperPort software. The XP450 is also Kofax VRS-certified.
