Visioneer® Capture SE Software

Visioneer

Flexible, Easy, Powerful, Document Capture Solution

Scanning jobs aren't created equal. Simple jobs can be quickly and easily processed and delivered with Visioneer's OneTouch software. Others require the ability to edit, rearrange and merge scanned pages with others. Organizations scanning routine packages – such as invoices, tax forms, or healthcare records – need more control. You need to separate scans into separate files, create indexes of the scanned pages, read and interpret barcodes, and extract data from the scan for other applications. That's where **Visioneer Capture SE** comes in.

The newest member of the Visioneer Intelligent Software Platform, Capture SE is included with each new Visioneer or Xerox scanner purchase. It's easy enough to start up on your own, powerful enough for fleet deployments. Installation and consulting services are available to help you get the job done.

Visioneer® Capture SE Software

Scanning Flexibility
Directly set and adjust the scan profile without opening up a complex driver screen. A Scan Settings window offers more detailed options, including Visioneer's TWAIN interface.

Batch Management
Each scan job is saved as a batch, automatically named and listed in Capture's Batch Explorer. You can create new batches, delete batches, and merge or split batches.

Easy Editing
Visioneer Capture's Batch Preview lets you edit and finalize the scan job. Pages can be rearranged, deleted, and edited. Simple controls make cleanup and adjustments easy.

Built-in Image Processing
Visioneer Acuity image processing is built into Visioneer Capture, ensuring high quality scans. Acuity includes more than 25 features such as dynamic threshold and advanced color dropout.

User Interface Choices
To customize the experience for different users, an interface settings window lets you choose what you want to see on the screen. You can turn windows on or off and adjust scan thumbnail sizes.

Job Separation
Scan jobs can be separated automatically into separate batches, using Patch Code detection, Barcodes (20 formats are supported) or a fixed number of pages.
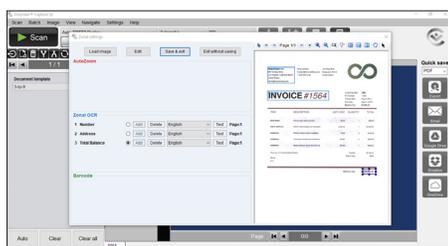

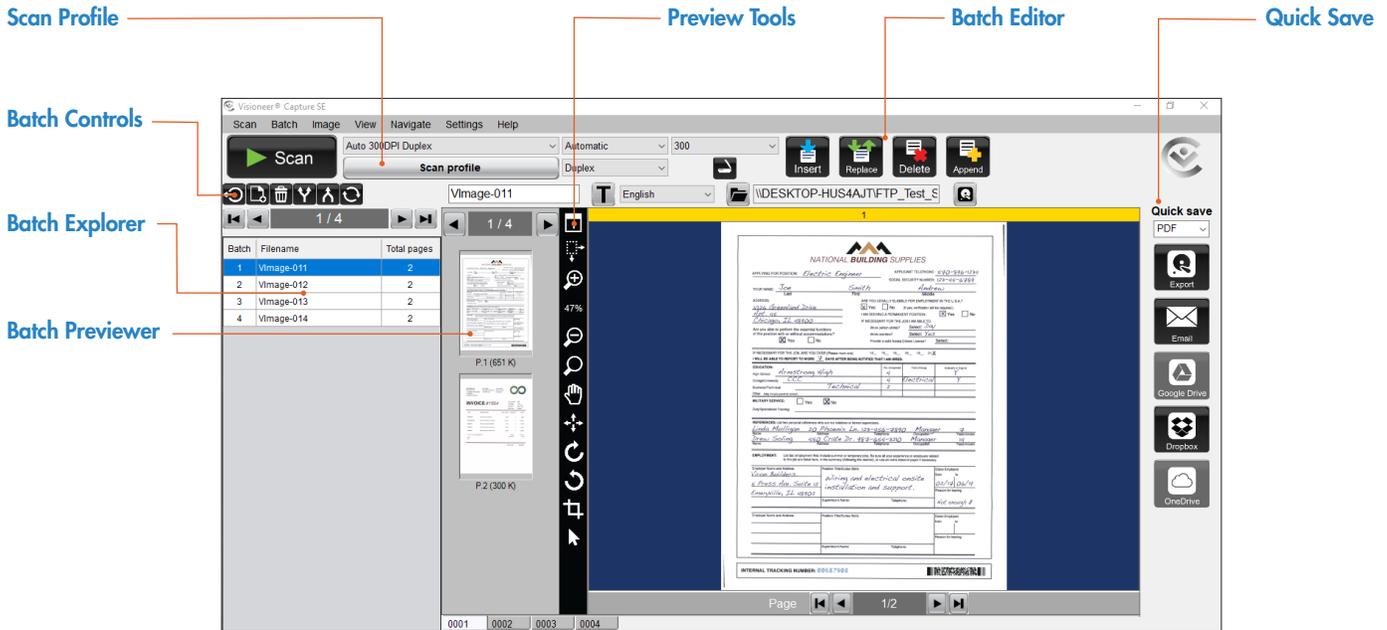

Powerful Indexing
Index Mode uses intelligent technology and gives Visioneer Capture its power. Zonal OCR or barcode data is used for data extraction and metadata index file creation.

Save to Cloud, Network or PC
Share and Save releases each batch to a choice of file formats - PDF, PDF/A, Searchable PDF, JPG, BMP or TIFF are supported - to PC, network destinations and cloud services.

Scan Profile · Preview Tools · Batch Editor · Quick Save · Batch Controls · Batch Explorer · Batch Previewer

Zonal OCR

Capture SE System Requirements
- Intel Core 2 or equivalent processor
- Microsoft® Windows® 7 SP1, 8, 8.1, 10
- 2GB internal memory
- 1.5GB min available hard drive space
- 24- or 32-bit monitor, at least 1024 x 764 resolution

Patch code Scanning

Visioneer Intelligent Software Platform

OneTouch
An easy-to-use scanner workflow application that performs all steps in a complex scanning operation at the touch of a button.

Acuity
Enables you to improve the visual clarity of scans. Acuity uses over 25 advanced algorithms to intelligently correct documents.

DriverPLUS
Provides an impressive array of settings to enable precise scan customization with a simple-to-use interface and helpful tool tips.

Organizer AI
Manages your files with fast search, conversion, file analysis and cleanup, tagging, PDF editor and automated file classification.
