

Installation Guide

Visioneer® 7800 Tag That Photo Scanner

PART 1: Setting Up Your Scanner

1. Installation Process

Insert the DVD into your computer and click **Install Scanner Driver**.

NOTE: If you do not have a CD/DVD drive, using your internet browser open www.visioneer.com/install7800, download the installer, unzip the Visioneer 7800 Scanner Installer folder to your PC desktop, open the folder, and click on the **Autorun** file with the CD icon on its left.

2. Connect the Scanner to Computer

Using the provided USB cable connect the scanner to your PC USB input.

3. Start Scanning

- From the Windows Start button, find and open the **Capture Tool Application**
- Place a photo or document on the scanner (face down) and click the **Capture Tool Scan** button

To change settings and preferences, familiarize yourself with the menu options across the Capture Tool navigation bar.

4. Register Your Scanner

Please register your scanner to activate the scanner's warranty. You'll find the scanner serial number on the bottom of your scanner. Go to www.visioneer.com/registration

PART 2: Setting Up Tag That Photo Software

Your Visioneer 7800 Tag That Photo Scanner comes with a one-year subscription to Tag That Photo, a facial recognition PC application that helps you tag and find people in your PC photo collections.

1. To install Tag That Photo, go to <https://tagthatphoto.com/visioneer>.
2. Complete the form and click the **Download Now** button (you will need your scanner serial number again).
3. Watch your email inbox with installation instructions.
4. You'll find the Tag That Photo application in the Windows Start application list.
5. Happy tagging!
